What awaits you during your studies

Medical and Pharmaceutical Biotechnology

Our master degree programme is designed to provide you with extensive knowledge and expertise in biotechnology, from medical research to pharmaceutical production.

On the master programme, you will strengthen your methods-based and problem-solving skills, putting you in a position to overcome the challenges associated with developing and producing innovative treatments for cancer, autoimmune conditions or neurodegenerative diseases. You will apply state-of-the-art, interdisciplinary strategies, such as growing “mini tumors” to help predict the effects of cancer treatments.

At a glance

Full-time

Courses usually take place from Monday to Friday.

English

The language of instruction is English. This prepares you for your international career in a multicultural environment.

4 semesters

The degree programme lasts 2 years, with a total workload of 120 ECTS. Graduates receive the academic degree of Master of Science in Engineering (MSc).

Study fee

EU/EEA citizens pay a study fee of EUR 363.36 per semester, plus the student union fee.

Did you know that ...

... a particularly attractive option is the double degree we offer in cooperation with Linköping University in Sweden? Besides obtaining a Master of Science at IMC Krems, you will also be accredited with completing the “Experimental and Medical Biosciences” programme at our partner institution.
